

Jordan Avery

Data Engineer

Tel Aviv, Israel | jordan.avery@example.com | linkedin.com/in/jordan-avery-example

PROFILE

Data engineer with 6 years of experience building batch data pipelines and BI platforms for retail and healthcare companies. Comfortable across the stack, from SQL modeling to Python ETL and dashboarding.

PROFESSIONAL EXPERIENCE

Senior Data Engineer, Harborlight Logistics

Apr 2022 – Present

- Joined to build the company's new data platform.

Data Engineer, Quillstone Retail

Jan 2019 – Mar 2022

- Built and maintained 40+ Airflow DAGs ingesting POS and e-commerce data into Amazon Redshift.
- Migrated legacy SSIS jobs to Python, reducing nightly load time from 5 hours to 2 hours.
- Optimised Redshift distribution and sort keys, cutting dashboard query times by 60%.
- Designed a dimensional sales model used by 120 analysts across 3 countries.
- Worked on data quality checks with Great Expectations.

BI Developer, Pinecrest Health Analytics

Aug 2016 – Dec 2018

- Developed Tableau dashboards for hospital operations teams.
- Wrote complex SQL for claims analysis in SQL Server.
- Responsible for monthly reporting to 14 client hospitals.
