

Jordan Avery

Data Engineering Team Lead

Tel Aviv, Israel | jordan.avery@example.com | linkedin.com/in/jordan-avery-example

PROFILE

Data engineering team lead with 10 years in data, from BI and dimensional modeling to owning a cloud data platform end to end: a Databricks lakehouse, batch and streaming pipelines, and dbt-based analytics engineering with tests and data contracts.

Currently leads a team of 4 data engineers at Harborlight Logistics. Looking for a senior data engineering or data platform lead role.

PROFESSIONAL EXPERIENCE

Harborlight Logistics

Apr 2022 – Present

Data Engineering Team Lead (Jan 2024 – Present) · **Senior Data Engineer** (Apr 2022 – Dec 2023)

B2B SaaS for freight visibility used by shippers and carriers

- Lead a team of 4 data engineers that owns the data platform: carrier GPS/telematics and shipment-event ingestion, the lakehouse, dbt models and internal analytics
- Built the lakehouse on Databricks and Delta Lake, replacing Redshift and migrating 30 pipelines, which cut monthly warehouse cost by about 35%
- Built a near-real-time ETA events pipeline with Kinesis and Spark Structured Streaming, reducing latency from about 1 hour (batch) to under 5 minutes
- Introduced dbt with tests and set up data contracts with the backend team so schema changes stop breaking pipelines
- Work closely with data science, product and backend teams; write design docs and take part in the on-call rotation
- Interviewed and hired 2 engineers; mentor 2 junior engineers

Data Engineer · Quillstone Retail

Jan 2019 – Mar 2022

- Built and maintained 40+ Airflow DAGs ingesting POS and e-commerce data into Amazon Redshift
- Processed clickstream data with Apache Spark on Amazon EMR for about a year
- Designed a dimensional data model for sales reporting, used by 120 analysts across 3 countries
- Migrated legacy SSIS jobs to Python, reducing nightly load time from 5 hours to 2 hours
- Optimized Redshift distribution and sort keys, cutting dashboard query times by 60%
- Contributed to data quality checks with Great Expectations

BI Developer · Pinecrest Health Analytics

Aug 2016 – Dec 2018

- Developed Tableau dashboards for hospital operations teams and monthly reporting for 14 client hospitals
- Wrote complex SQL for claims analysis in SQL Server

TECHNICAL SKILLS

Languages: Python, SQL, Bash

Data: Databricks, Delta Lake, Apache Spark, dbt, Airflow, Amazon Redshift, Great Expectations, Tableau

Cloud: AWS (S3, Kinesis, Lambda, Glue, EMR), Terraform, GitHub Actions, Docker

EDUCATION

B.Sc. Industrial Engineering and Management · Ben-Gurion University of the Negev

2012 – 2016

MILITARY SERVICE

Operations Analyst · IDF

2009 – 2012

LANGUAGES

Hebrew (Native) · English (Fluent)
